

GENERAL INTRODUCTION

In modern buildings, fan-coil units are the core elements of climate control systems. The EPL-FCU4R multiplexer board enables you to control up to four fan-coil units within the same zone using a single thermostat. Designed and manufactured in Turkey with premium quality components, this smart and economical solution increases efficiency and reduces operational costs.

Key Feature:

Control 4 fan-coil units using a single thermostat.

ADVANTAGES

◆ Cost-Efficient Solution

With EPL-FCU4R, you can manage four separate fan-coil units through just one thermostat. This dramatically reduces both thermostat and cabling expenses, making it a highly economical choice for any installation.

◆ Robust Design, Reliable Operation

Built with long-lasting materials and a quality-first production approach, the EPL-FCU4R is designed for many years of trouble-free operation—even under demanding conditions.

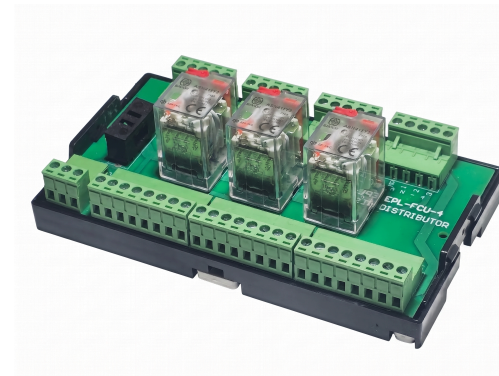

TECHNICAL SPECIFICATIONS

ELECTRICAL PARAMETERS

Power Supply:	220 VAC ±15% / 50-60 Hz
Power Consumption:	1250 VA / 150W

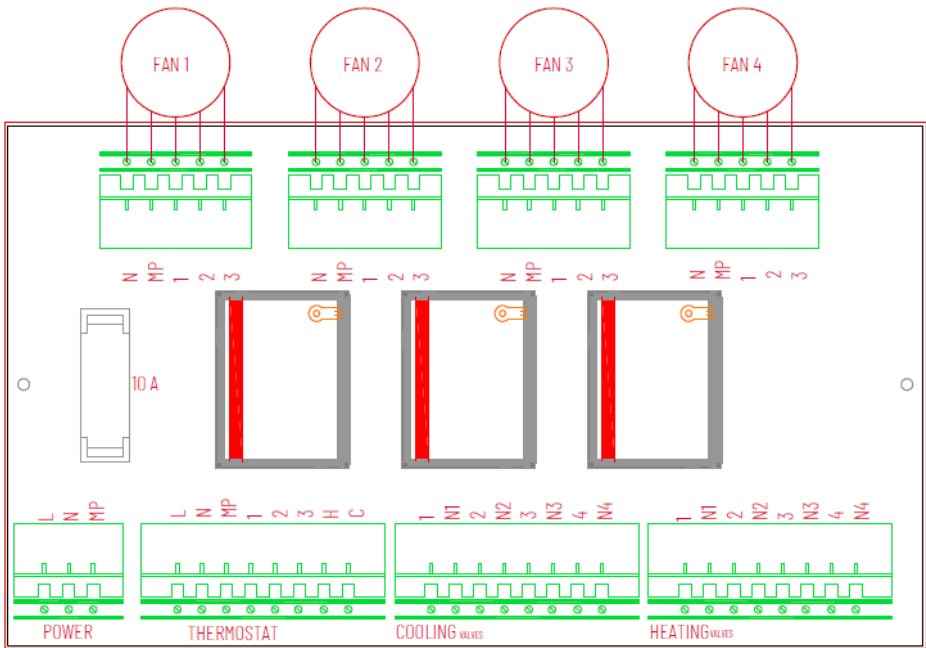

ENVIRONMENTAL CONDITIONS

Temperature & Humidity	Temperature Range: -40 °C to +70 °C Humidity Range: 5% to 98% RH, + 40 °C (non-condensing)
------------------------	--

WIRING DIAGRAM & INSTALLATION

Refer for the full wiring diagram and layout illustration. The diagram clearly shows connection points for fans, valves, and thermostat interfaces.

PHYSICAL DIMENSIONS

DIMENSIONS AND WEIGHT	
Dimensions (W x D x H)	195 x 145 x 85 mm
Weight	0.6 Kg
Mounting Type	In_Box / DIN ray (TS35)
